

HAKMET ARBRO HARVESTER HEAD

Overview

- The small harvester head can be mounted on a farm tractor and is well suited for thinnings.
- Fells, delimits and cuts to length
- The Hakmet measuring system measures diameter, length and volume

Purchase price, CAD	Model 400 – \$46,000 Model 1000 – \$79,000
Productivity range, m ³ /PMH	15 (thinning)
Training requirements	High
Weight, kg	220
Horsepower required, HP	55
Oil pressure/flow needed	200 bar, 120 l/min
Max. cutting diameter, mm	280
Country of origin	Quebec
Canadian dealers	Quebec

Evaluation & Recommendations

- Established work methods in eastern Canada
- Compatible with a wide range of base machines available in BC
- May require some modifications in the cab to control the attachment
- Suitable for semi-professional to small contracting operations
- BC (local) dealer is an advantage
- Medium training requirements
